

CORPORATE BROCHURE

**TRASPORTI
PESANTI**

The Company

We are part of **Storti Group**, a **logistic operator** that can offer **different transport services** around Europe by **railway, road and sea**. Thanks to our **capability** and **partnerships with important market leaders**, we can design **sustainable logistic projects**, using our own intermodal terminals, located in Piadena and Cremona.

ASTL was born in 2012 with the aim to create a **new intermodal logistic model for steel products**. The operative branches are **Cremona and Trieste**.

Storti Group as a whole counts more than **600 employees, 6 rail terminals, 300 vehicles and 1.700 transport units**.

Sinvest is the holding. Its **main business is transport, logistics and vehicle rental services and real estate management**.

Ford Trucks Italia guarantees **innovative vehicles** to its **customers**, thanks to high experience, **development potential, high performances and comfort**.

VipOne is an **industrial and commercial vehicle rental company**.

Ovip DAF Dealer is located in **Piacenza**. It is a **Daf Trucks official dealer and mechanical workshop**, but it can offer **assistance to all-brands vehicles**.

WLF Trucks is the **first Italian dealer** to sell the **full range of Ford Trucks** and to offer **H24 assistance**.

Our DNA

Storti Group, with a professional experience of **over 75 years** and a third generation family management, is a **point of reference in the world of logistics**. With a **high specialization in steel products transport**, the **real expansive energy of the company** is a professional, young and motivated team.

Our strenght

The strategical position in the heart of Pianura Padana, among the cities of Brescia, Cremona, Mantua, Parma, Reggio Emilia, Verona enables us to be an **important hub** for goods stocking, shipping and transport all around **Italy** and **Europe**.

- ✓ **Competitive prices**
- ✓ **Efficiency** in all phases of transport planning (maximum exploit of full truck load)
- ✓ **Custom-made services** and 360° solutions, included vessel, train and truck transport
- ✓ Focus on **sustainability**, both in vehicle choice and real estate investments, such as offices and warehouses

What we can offer

Trasporti Pesanti is a **reliable** and **efficient partner**, capable to offer **custom-made** solutions and to satisfy any need.

- ✓ Fleet capable of **satisfying a large variety** of transport (FTL and overweight)
- ✓ **Own terminals** for **conventional** and **intermodal** transport
- ✓ Important **areas for goods stocking**, with **geolocation tracking**, using latest-generation softwares.
- ✓ **Own internal** and mobile workshop, to minimize delays and difficulties caused by failures

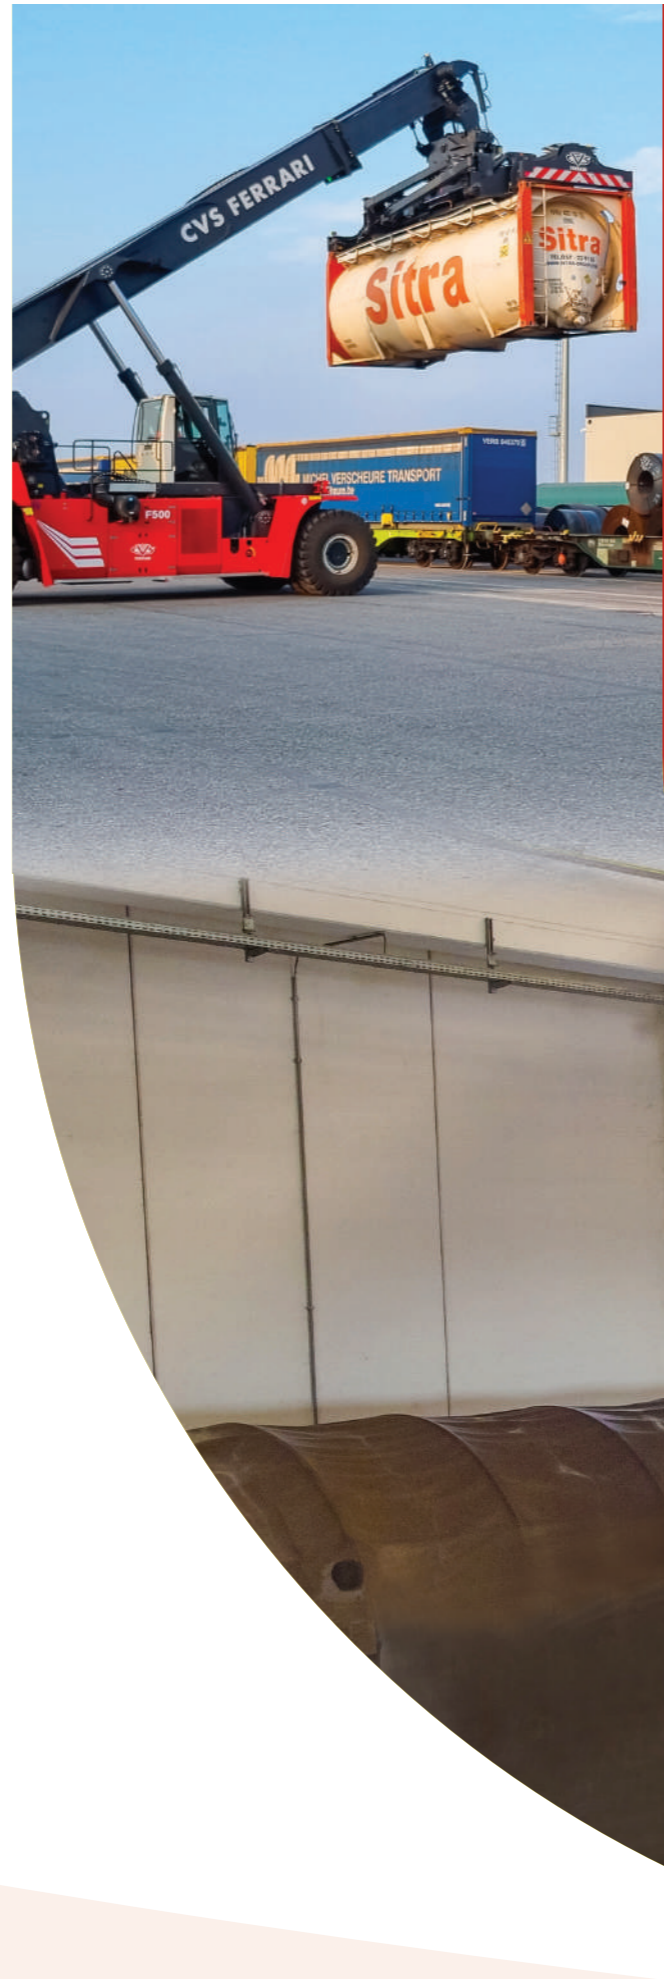

Our services

Intermodal transport

We create **sustainable logistic** projects, using **railway, road, sea** and **river transport**, thanks to several **partnerships** with **leading companies** all around Europe (railway companies, carriers, marine and customs agencies).

Inside our terminal we can count **9 tracks** (3 with the possibility of loading/unloading inside a covered warehouse), **2 rail/road shunters**, **6 reach-stackers** and **10 forklifts** for goods handling.

We can accept **575 m-long trains**, **D4 category** (the highest) and **P400 profile** and **hazardous RID/ADR goods**. All the tracks are electrified at the root, so that it is not necessary to add extra shuntings.

Siderurgical combined transport

We are a strategic player in Europe thanks to our own railway terminal and more than 100 vehicles for **overweight transport** of **steel products, such as coils, slabs, blooms**.

Hundreds of tons of **raw material, semi-finished products** and **iron scrap** arrive every day in our establishments by train, to be delivered to customers using our trucks.

We are authorized to operate all over Italy, with the capacity to **process orders within the 24H** and **competitive rates**, thanks to scale economies and high volume handled goods.

Full Truck Load

We can handle every kind of land transport, both national and international, with **flexible, convenient and custom-made solutions**. Our focus is to satisfy customers' needs at the best; we can **minimize not efficient routes** and waiting times, thanks to specialization and expertise.

All our trucks have **waste transport authorization**, they are **equipped for ADR** and with all the necessary for a **safe transport** (ratcheting straps, corner protections, etc.).

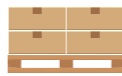

Less than Truck Load

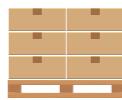

We are part of an **international network** that allows us to satisfy delivery need: **nonstop** (24/48h delivery), standard (48/72h delivery) and **international** (Europe).

Our service includes: pick-up and delivery with tail-lift trucks, returnable pallets, limited traffic zones (LTZ) delivery, portorage and **track & trace online**.

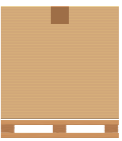

MINIQUARTER
80/100x120x60h
max Kg 150

QUARTER
80/100x120x80h
max Kg 300

MEDIUM
80/100x120x160h
max Kg 600

LIGHT
80/100x120x240h
max Kg 300

FULL
80/100x120x240h
max Kg 900

MEGA
80/100x120x240h
max Kg 1.200

Our Fleet

Overweight transport

100 overweight trucks, authorized for **steel coils transport** (both lorries with **saddles** and **tractor-trailers**)

Road tractor

180 road tractors

250 semitrailers

Specialized vehicles

5 lowbed extendable trailers

Tractors

6 rigids

Semitrailers

10 tipper trailers

40 spring semitrailers

20 open semitrailers

20 container chassis

5 city semitrailers

250 curtainsider open top semitrailers (with 2,70 m usable internal height)

Stocking Areas

PIADENA

180.000 sqm area

For stocking of steel goods,
containers and other material

27.000 sqm covered area

With 5 overhead 45-ton cranes

CREMONA

30.000 sqm

Stocking area

8.000 sqm covered area

With 2 overhead 45-ton cranes

What we do for the environment

We are **duly committed towards the environment**, because we believe that our business can make the difference in leaving a **better world to the next generations**.

Storti Group **invested and continues to invest in sustainable transport**, to **guarantee a reduction of the environmental impact**.

01 Attention to the fleet

Fleet: all our trucks are Euro 6 and low maintenance

Eco-friendly driving: official courses for professional drivers in cooperation with trucks manufacturer to achieve the best fuel consumption (fuel and emissions reduced up to 20%) and incentive system for truck drivers for an efficient and safe driving

Overweight transport: fuel reduction up to 30% for a single trip compared to a traditional 44 tons truck

02 Structural efficiency

Water recovery: thanks to a depuration system, our washing system for industrial vehicles can re-use water, reducing the quantity of potable water required

5,5 MW photovoltaic plants: the energy we use is sustainably-produced

Thermal machines: we use high-efficiency heating and cooling systems for all our buildings to reduce power consumption

03 Intermodal transport

Modes of transport: we promote railway and sea transport

Road traffic: road transport reduction

Pollution: CO₂ emissions reduction
